(54) Title: APPARATUS FOR PEELING OUTER SKINS OF GARLIC USING WET PROCESS

(57) Abstract: Disclosed is an apparatus for peeling the outer skins of garlic using a wet process that is provided with a garlic bulb splitting part (100) and a garlic clove peeling part (200) that have different structures from each other, to thereby improve the capabilities both in the separation of the garlic bulbs and the peeling of the outer skins of the garlic cloves and to thereby improve the separation of the garlic meats from the outer skins in the steps where the garlic cloves are put into each garlic clove peeling part (200), and with a separate water discharging tank (700) for purifying the water used for the peeling of the garlic before discharging to thereby prevent environmental contamination.
